

MAHATMA GANDHI UNIVERSITY of MEDICAL SCIENCES & TECHNOLOGY JAIPUR

Organ Donation and Transplantation

PRESIDENT
Mahatma Gandhi University of
Medical Sciences & Technology
Sitapura, JAIPUR-302 022

Objectives of the Practice

Mahatma Gandhi Hospital (MGH) under the aegis of Mahatma Gandhi University of Medical Sciences and Technology (MGUMST) is a pioneer institute in the field of organ transplantation not only in the state of Rajasthan but also nationally and globally.

Objectives of practice are-

1. To promote awareness, motivate the community and change behavior of the people towards organ donation.
2. To provide comprehensive, cutting-edge healthcare to the people needing organ transplantation.
3. To develop MGH as a apex institute in the field of organ transplantation.

The Context

There is universal shortage of organ donors globally but India lags far behind in comparison to the rest of the world. Nearly every person who dies naturally or in accident, is potential donor. Even then, innumerable needy patients cannot find an organ donor. When organs are not functioning properly and no treatment works out in last stage, transplantation may be the only option to live normal, healthy life.

There is wide gap between patients who need transplant and the organs that are available in the country. An estimated 1.8 lakh persons suffer from renal insufficiency every year, however the number of renal transplants done is 6000 only. Annually about 25 thousand liver transplants are needed in India but about one thousand five hundred are being performed. Only 10-15 heart transplant are done annually in India.

The Practice

All our Transplant centers are equipped with:

- Dedicated Operating Theatres customized for transplant surgeries
- Dedicated State-of-the-Art Intensive Care Units
- Advanced blood center facilities
- High end Laboratories for all tests and investigations
- Diagnostic and Radiology Facilities which include 128 Slice CT scan, 3 Tesla MRI machine, high-end Ultrasound facilities.
- Dedicated wards and rooms for transplant patients.

PRESIDENT
Mahatma Gandhi University of
Medical Sciences & Technology
Sitapura, JAIPUR-302 022

- Counselors and Transplant Co-coordinators to take care of all needs.
- Translators to counsel patients in all languages.
- Dedicated help lines and unit managers to take care of treatment needs and requirements.
- Dedicated and trained nursing staff for pre-operative and post-operative care.

Renal Transplant Center

MGH is at the forefront in providing comprehensive and cutting-edge healthcare to patients needing renal transplants. A multi-disciplinary team of doctors are empowered with state-of-the-art infrastructure and medical instrumentation.

The lifestyle diseases have contributed to an increase in chronic kidney problems. Chronic kidney disease in India is prevalent in approximately 800 per million people. Our hospital is very popular and people from different part of country prefer Mahatma Gandhi hospital by registering here for live donor transplant considering the quality care provided.

The procedures for kidney transplantation include:

- Cadaveric renal transplantation
- Living donor kidney transplants (Swap and ABO Incompatible)
- Laparoscopic donor Nephrectomy

The hospital has high end technological infrastructure and medical facilities that allow safer, better and comprehensive medical care with high success rate. The Institute is also supported by world class services in transfusion medicine, pathology, laboratory medicine, cardiology, endocrinology, nephrology and pulmonology, all of which together give us that extra edge.

Liver Transplant Center

Every liver transplant is an amalgam of the highest level of expertise in liver, biliary and vascular surgery, as well as advanced support from experts in liver and biliary surgery, adult and pediatric hepatology, hepatobiliary and transplant anaesthesia, critical care, diagnostic and interventional radiology, and liver oncology have come together under one roof to create an unparalleled oasis of talent at MG hospital medical college. The liver transplant centre is committed to a scientific, compassionate and patient-friendly approach.

Heart, lung and pancreatic transplant

In a heart transplant surgery, a diseased heart is replaced with donor's healthy heart. The number of cardiovascular diseases (CVDs) are leading causes. Diabetes is a silent killer. Pancreatic transplantation is the only available cure for diabetes in appropriately selected patients. Pancreas transplantation adds a significant survival benefit to diabetic patients.

Evidence of success

Under the leadership of highly skilled transplant surgeons, MGH has successfully achieved following in last 6 years:

- More than 1000 renal transplants including kidney donor transplant
- 17 cadaveric renal transplants.
- More than 50 ABO incompatible renal transplants
- More than 50 swap renal transplants
- More than 15 liver transplants
- Two heart transplants
- One pancreatic transplant
- One lung transplant

Mahatma Gandhi Hospital is also a recognized center for cornea transplant, bone marrow transplant and skin transplant. The center has performed more than 20 cornea transplants, 2 bone marrow transplant while one skin transplant

Mahatma Gandhi Hospital under the aegis of MGUMST is first teaching hospital in the state to perform

- Heart transplant
- Pancreatic transplant
- Living Donor Liver Transplant

Mahatma Gandhi Hospital has got license for bone transplant and intestine transplant, uterine transplant, arms & limbs transplant as well from Government of Rajasthan.

Renal Transplants

MGH is at the forefront in providing comprehensive and cutting-edge healthcare to patients needing renal transplants.

Our hospital is very popular and people from different part of country prefer Mahatma Gandhi hospital by registering here for live donor transplant considering quality care provided.

So far 1065 Kidneys Transplanted out of which 17 were from cadaver donor, 79 were ABO Incompatible and 54 were SWAP Transplants.

Form-17

Certificate of Renewal of Registration

(To be given by the appropriated authority on the letter head)
[See rule 25(2)]

This is with reference to the application dated **08.09.2017** from **Mahatma Gandhi Medical College & Hospital, Sitapura, Jaipur** for renewal of certificate of registration for performing **Kidney** retrieval/transplantation under the Transplantation of Human Organs Act, 1994 (42 of 1994).

After having considered the facilities and standards of the above-said hospital, the Appropriate Authority hereby renews the certificate of registration of the said hospital for a period of five years(up to 31.10.2022).

This renewal is being given with the current facilities and staff shown in the present application form. Any reduction in the staff and/or facility must be brought to the notice of the undersigned.

Place : Jaipur.

Date: 01.11.2017

HEART, LUNG AND PANCREATIC TRANSPLANT

In a heart transplant surgery, a diseased heart is replaced with donor's healthy heart. The number of cardiovascular diseases (CVDs) are leading causes. Diabetes is a silent killer. Pancreatic transplantation is the only available cure for diabetes in appropriately selected patients. Pancreas transplantation adds a significant survival benefit to diabetic patients.

So far 2 Heart, One Lung (Bi-lateral) and One Pancreas were transplanted
