25. Types of Courses in M.Sc. (Medical) Anatomy :-

1. Core Course-course designed under this category aim to cover the basics that a student is expected to imbibe in the discipline of M.Sc.(Medical) Anatomy. A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.

2. Elective Course-it is a course which can be chosen from a pool of courses it is specific or specialized or advanced or supportive to the discipline of M.Sc.(Medical) Anatomy. Students have to **CHOOSE ANY TWO COURSE IN EACH SEMSTER** from the pool of course given to that semester.

3. Practical/ Ability Enhancement Courses (AEC: The Ability Enhancement (AE) Courses or practical are the courses based upon the content that leads to Knowledge enhancement. They are skill-based and are aimed at providing hands-on-training, competencies, skills, etc.

Computation of SGPA and CGPA

The UGC recommends the following procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

- i. The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student , i.e

$$\text{SGPA}(S_i) = \frac{\sum(C_i \times G_i)}{\sum C_i}$$

Where C_i is the number of credits of the i th course and G_i is the gradepoint scored by the student in the i th course.

[Type text]

- ii. The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a program, i.e.

$$CGPA = \frac{\sum(C_i \times S_i)}{\sum C_i}$$

Where S_i is the SGPA of the semester and C_i is the total number of credits in that semester.

- iii. The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

Illustration of Computation of SGPA and CGPA and Format for Transcripts

- i. Computation of SGPA and CGPA

Illustration for SGPA

Course	Credit	Grade letter	Grade point	CreditPoint (Credit x Grade)
Course1	3	A	8	3X 8 = 24
Course2	4	B+	7	4X 7 = 28
Course3	3	B	6	3X6=18
Course4	3	O	10	3X10= 30
Course5	3	C	5	3X5 = 15
Course6	4	B	6	4X 6= 24
	20			139

Thus, $SGPA = 139/20 = 6.95$

Illustration for CGPA

Semester1	Semester2	Semester3	Semester4
Credit:20 SGPA:6.9	Credit:22 SGPA:7.8	Credit :25 SGPA:5.6	Credit:26 SGPA:6.0

Semester5	Semester6		
Credit : 26SGPA:6 .3	Credit :25 SGPA:8.0		

Thus, $20 \times 6.9 + 22 \times 7.8 + 25 \times 5.6 + 26 \times 6.0 + 26 \times 6.3 + 25 \times 8.0$

CGPA = $\frac{\quad}{\quad} = 6.73$
